

## MILITARY UAV CASES & INSERTS

Our fighting forces depend on UFP Technologies' custom cases and inserts to protect portable unmanned aerial vehicles from the rigors of the battlefield. We specialize in designing and fabricating the premier protective and rapid deployment solution for UAVs, drones, or any other mission critical equipment.

We work with you to determine the best materials to create a custom insert for your UAV. As one of the largest foam fabricators in North America, we have partnerships with numerous suppliers. This gives us exclusive access to materials specifically created for protective case inserts within the military sector.

Our team of Certified Packaging Engineers have decades of experience in designing custom inserts for protective UAV cases. Along with UAVs, we have created case and insert solutions for a variety for military applications including equipment, tools, sensitive communications equipment and weapons systems.

## THE MATERIAL WE'RE MADE OF

When we design a solution, we're not just thinking about cell structures, densities, and other technical matters. We're thinking about the people who depend on us every day. The safety of the soldier in the field. The health of the patient in the operating room. The comfort of the driver on the highway. And everyone else who needs our solutions to perform at the highest level.

For us, it's not just about making great products better, or getting them to market safely. *It's about protecting and improving lives, in every way we can.*

## CAPABILITIES

Design & Engineering  
Fabrication  
Molded Fiber Manufacturing  
Thermoforming  
Cleanroom Manufacturing  
Contract Manufacturing  
Tooling

## CERTIFICATIONS

AS9100  
ISO 9001  
ISO 13485  
ISO 14001  
IATF 16949  
FDA Registered

## LOCATIONS
